

AI Business Solutions

Connect Microsoft 365 productivity, Viva employee experience, and business artificial intelligence (AI). Build a practical path to collaboration, adoption, and useful outcomes.

Capabilities

- Microsoft 365, Viva, and Copilot readiness and adoption.
- Business-process discovery and workflow transformation.
- Custom AI grounded in approved organizational knowledge.
- Governance, evaluation, and bounded system integrations.
- Role-based learning and privacy-aware value measurement.

Deliverables

- A prioritized use-case portfolio and pilot charter.
- A readiness assessment and solution blueprint.
- Evaluation criteria and an adoption playbook.
- A sequenced improvement roadmap.

Business value

Less process friction, more useful knowledge, and better-supported work. Measure quality and sustained adoption rather than equating usage with financial return.

Start with an AI strategy and governance roadmap.

Bring an important business challenge, its owner, and the systems and data involved. Define a focused pilot and the evidence needed for the next decision.
